August ExCom/OpCom Monthly Meeting

Prepared by: Max Cherubin

The IEEE Foothill Section had our ExCom/OpCom Meeting last August 9, 2022, and the meeting started at exactly 07:09 pm. The chairman had his remarks regarding the IEEE Move Truck. An IEEE-USA mobile emergency relief program committed to assisting victims of natural disasters with short-term communication, infrastructure, computer, and power solutions. They reached out to the chair and are planning to stop at CPP University, which will happen on September 10th.

Section and Committees

In Membership Status, Kim said we got a total of 896 members. Sixteen new members for the month of July, 5 from member grade and 11 from student-undergraduate. For senior elevation, we have two newly elevated senior members, James Liao and Kurt Busch.

In Social Media and Websites, we haven't improved this month, and it seems that most students are more active in Discord than on Facebook. Osman always reminding us to post events and updates in social media for the page to be promoted and at the same time we can gather some volunteers.

Student Chapter

In the student chapter, Ivan Magana was able to report. He said CSUSB student officers might have their first meeting at the start of next month.

Technical Committees

For MTT/Ed-CAS, Scott couldn't attend the meeting, but he was working on planning the 75th Anniversary of the Transistor. The Mobile World to Congress is going to Las Vegas on September 28 to 30.

Nanotechnology Dr. Jenny Yu reported that they already have a list of speakers, so as soon as classes start, they will start their first event.

Communication Society, Dr. Tamer Omar, and James Liao are trying to come up with a survey form for the members to organize suitable events in the future.

YP still doesn't have a chair.

Kim Mosley from WiE is thinking of having a talk. She has Kathleen Kramer as a guest speaker who runs as a regional director in Region 6 of what she's accomplished as a director position in Region 6 and other things that she's done. Once she agrees, WiE will work with Consultants Network for an event.

Consultant Network meeting had their meeting last August 3rd and has 9 attendees. Their next meeting will be on September 7th.

Upcoming Events:

- September ExCom/OpCom Monthly Meeting
September 13, 2022
- Foothill Consultants Network Meeting
September 07, 2022
- IEEE Foothill Move @ CPP
September 10, 2022
