The IEEE Geoscience & Remote Sensing Society Chapter and Young Professional Affinity Group presents a Technical Poster Session

Bring a poster, model, demo, or other portable artifact describing your work. The item could be old or new, related to remote sensing or not. We will have poster stands and tables to accommodate. Posters will be arrayed in the room and on the outdoor areas just outside the room. Don't have a poster printed? Bring an e-poster and we will do an e-poster session talk indoors. ***Prizes will be awarded to the participants.***

The idea is simply to engage your colleagues with a topic that inspires you and may inspire them, with minimal effort on your part. Please bring yourself, and any colleague interested in becoming a member of GRSS and/or YP. We will have enrollment forms at the event. ***Refreshments will be served!***

AGENDA

5:00 pm – Registration
